

Drs. Branton and Jarrah Patient Portal

Why do we need a Patient Portal? It is a requirement by Health and Human Services and Meaningful Use to allow patients electronic access to our practice in order to enhance patient-provider communication, empower patients, support care between visits, and, most importantly, improve patient outcomes.

A patient portal is a secure online website that gives patients convenient 24-hour access to personal health information from anywhere with an Internet connection. Using a secure username and password, patients can view health information such as:

- Recent doctor visits
- Discharge summaries
- Medications
- Immunizations
- Allergies
- Lab results

Some patient portals also allow patients to:

- Exchange secure e-mail with their health care teams
- Request prescription refills
- Schedule non-urgent appointments
- Check benefits and coverage
- Update contact information
- Make payments
- Download and complete forms
- View educational materials
